Don't add people. Add Agents.

AI transformation in minutes, not months – by
evosystems.

Autonomous by Design. Human by Choice.

MarkXTM

The Self Evolving Business Solution
Autonomous by Design. Human by Choice.

cre-AI-ted by
evosystems GmbH

We face **reality** head-on.

If we want to stay competitive as a company, we need to digitalize differently than before:

I

Much faster

Digitalize, automate and agentize – faster and more thoroughly than ever before.

II

Significantly cheaper

With significantly lower project costs – from the very first process.

III

No additional headcount

From day one and throughout ongoing operations, with far less or even no additional staff.

Autonomously networked AI agents are no longer science fiction. They are reality, they are an opportunity – and a necessity to stand out from the competition.

What do you want to achieve with AI?

DIGITALIZE A PROCESS

Digitalization Check

A focused check: one day capturing the process, then an implementation concept with prioritized measures and an effort estimate.

Consulting · 1 week

FIND THE RIGHT START

AI Potential Analysis

A use-case map across your core processes, rated by benefit, effort and data situation – including a business case.

Consulting · 2–3 weeks

GET GOING NOW

MarkX™ Kickstart

Your productive AI agent platform: one core process goes live in MarkX™ – for up to 5 users, including a half-day training.

MarkX™ · 10 working days

AUTOMATE ROUTINE WORK

Automation Pilot

Eliminate one manual process – on your existing systems, no MarkX™ required, with a four-week settling-in phase.

AI solution · 2–4 days

Every offer has a fixed scope, a fixed price and a defined result.

WE BELIEVE IN OUR LOCATION

German-made. Hosted in the EU.

LOCATED IN GERMANY

German GmbH, German contract law

Developed in Germany. Contracts under German law, support in German and English, one personal contact with decision-making authority.

GDPR & EU HOSTING

Your data stays in the EU

Hosting exclusively in certified EU data centres, data processing agreement included, anonymization before every external AI call.

NO LOCK-IN

Transparent pricing, transparent terms

List prices are the same for every customer, fixed prices for projects, data export in standard formats. You always know where you stand.

Software that builds itself for you.

You describe your process – MarkX™ creates the application, runs it and keeps developing it. An ecosystem of specialized AI agents, 24 hours a day, 7 days a week.

- ◆ New programs and processes in natural language
- ◆ No requirement specifications, no change requests
- ◆ Automatic data migration from legacy systems – minutes, not months
- ◆ Digitalization, automation, analysis and control in one tool
- ◆ Fully autonomous operation if you wish – you decide how independent
- ◆ Implementation, operation and support from a single source

1

INPUT · 0 MIN

You describe what you need

One sentence in natural language is enough.

2

CREATOR AGENT · ~15 MIN

MarkX™ builds the application

Data model, forms, permissions and workflows – checked before going live.

3

OPERATION · FROM DAY 1

The agents take over the routine

They get in touch when a human decision is needed.

4

HISTORY · ANY TIME

Every change documented

You stay in control of every decision the AI makes.

Vom manuellen Prozess zum **autonomen Workflow.**

Mit MarkX™ digitalisierst Du Deine Prozesse – schnell, flexibel und KI-gestützt.

MarkX™

Don't add people. Add Agents.

evosystems

Manual work becomes an **autonomous process**.

STARTING POINT

Lots of manual work

Delivery call-offs arrive regularly by email as text files – with changing products, quantities and dates. Processing and planning cost working time week after week.

SOLUTION

The Delivery Call-off Manager

MarkX™ built the application itself: reading call-offs, supporting material planning, proposing production orders for the ERP – including data migration from the legacy system.

RESULT · FROM DAY 1

Savings start immediately

No multi-year project: from the first productive use, a substantial part of the manual work is gone.

OUTLOOK

The process runs autonomously

Next, the Mailbox Agent and Dispo Agent take over the entire flow – from the incoming call-off to production.

HAASTECHNIK
PASSION FOR METAL

“The Delivery Call-off Manager has been in production since day one – and the time savings showed up just as fast. With MarkX™ we’re now consistently taking the next step: a fully autonomous process from enquiry to production.”

**FRANK HAAS — MANAGING DIRECTOR,
HAASTECHNIK GMBH**

**Digitalized today. Saving from the first use.
Autonomous tomorrow.**

OUR PROMISE

We bridge the gap from your existing business software to the world of **agentic AI** – at your pace and at exactly the depth that suits your company.

Autonomous by Design. Human by Choice.
